## PROJECTS

[Medicine Inventory Web App ↗](#)  
Feb 2025 - Mar 2025  
Developed a Medicine Inventory Web App using React, Node.js, Express, and MongoDB. Enabled sellers to manage brands, medicines, and buyers, with features to add medicine types, process sales, and generate printable bills via RESTful APIs for a smooth user experience.

[Email Verification Authentication System ↗](#)  
Dec 2023 - Jan 2024  
Email Verification Authentication System is a secure and scalable user authentication platform built with Node.js and Express.js on the backend, and React.js for the frontend. It leverages MongoDB for efficient data storage and Mailtrap to handle seamless email delivery for account verification.  
  
The frontend is styled with Tailwind CSS for a modern, responsive UI, while React Router DOM manages client-side routing. Zustand is used for lightweight state management, ensuring a smooth user experience. This system offers secure user registration, email verification, and protected routes, enhancing overall application security and reliability.

## [Blog Junction ↗](#)

Jul 2023 - Sep 2023

Blog Junction is a modern and responsive blogging platform built with React, styled using Tailwind CSS, and powered by React Router for seamless navigation. The app fetches dynamic content using the Fetch API and implements efficient pagination for smooth browsing through posts.

With a clean and intuitive design, Blog Junction offers users an engaging experience, making it easy to explore, read, and interact with content. Whether it's personal stories, tech insights, or creative pieces, Blog Junction ensures a fast and responsive platform to connect readers with valuable content.
